REINVENTING THE BOX™

BLAST MODULES BY DROPBOX INC.

At DropBox Inc. our primary concern is the safety of your workers in and around the blast zone. We understand the necessity to equip your employees with a blast resistant area to securely store tools, hold meetings, take breaks, and manage projects. DropBox Inc. provides a standardized line of Blast Resistant Modules (BRM) that are PE Certified from 1.5 PSI up to 10 PSI Overpressure Rating.

Like all DropBox Inc. products our Blast Modules are fully insulated and equipped with HVACs to provide a climate controlled multi-functional space. Our floor plans are customizable and may be stacked or pulled together to make multi-box units.

BLAST RESISTANT MODULES (BRM)

FEATURES

- PE certified
- All steel exterior construction
- Custom floor plans
- Up to 10 PSI overpressure
- 200 milliseconds duration
- Optional Bard, Class 1 Div 2 HVAC system
- Engineered to meet industry standards
- Climate controlled
