

# RAFT RAIL (600x40mm)

## The design specifics of our **Raft Rail**.

RR600 is a foundation rail designed to work with all types of pods. It provides flexibility to choose what's best for your build approach in addition to the standard mesh chairs. It allows for a 40mm cover between the mesh and the pod. Its 360 degree design ensures that the spacer will always land "right side up" and maintain the 40mm spacing regardless of its position.

The Raft Rail comes with spikes that allow you to firmly attach it to the pods and keep it in place during the concrete pour. It is also 37% lighter than existing solutions while maintaining its strong, weight-bearing capability. Load-tested to hold up to 275kg and easier to transport, the Raft Rail hits the sweet spot in terms of weight and strength.

These chairs are batch tested and meet the AS/NZS 2425:2015 Standards for bar chairs in reinforced concrete.

# TECHNICAL INFORMATION

## APPLICATIONS

- Provides option for use in addition to standard bar chairs
- Suitable for all raft floor types
- Commercial & Residential construction

## TECHNICAL CHARACTERISTICS

Code	PR600
Cover	40mm
Length	600mm
Colour	Recycled Varies
Bag Quantity	24
Pallet Quantity	1200
Pallet Weight	114kg
Pallet Cubic Area (m <sup>3</sup> )	1.56m <sup>3</sup>
Test Standard	AS/NZS 2425:2015
H2S Resistance	A1 - Excellent*
Material	Polypropylene (PP)
*Chemical Effect; Excellent. Satisfactory to 72°F (22°C)	

## FEATURES AND BENEFITS

- Longer base allows faster installation
- 360 degree design ensures “right side up” position at all times
- Spikes allow installation stability
- Lightweight reinforced design
- Wide gaps in the body frame improves concrete flow

## EVERYDAY APPLICATION

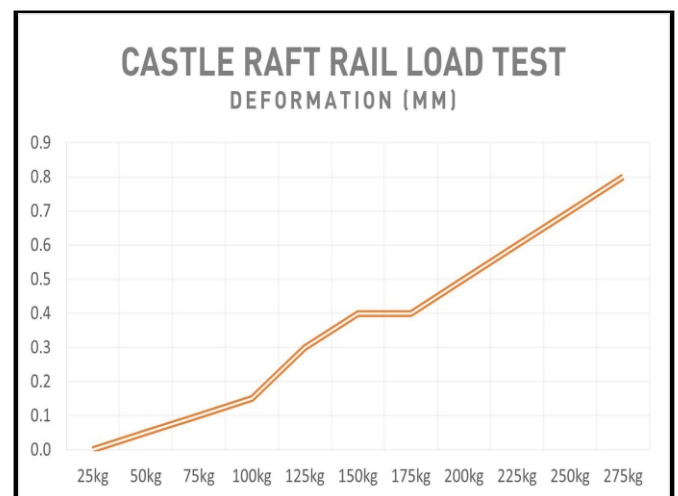

## TECHNICAL DIMENSIONS

**600mm x 40mm**

## TEST DATA
