

Webinar: The NCCCO Foundation Report on Virtual Reality's Role in Crane Operator Certification Testing

Presented by:

Graham Brent, CEO, NCCCO Foundation

Zack Parnell, CEO & President, ITI

Wallace Judd, PhD & CEO, Authentic Testing

WHY ITI?

'WE EXIST TO SERVE AND LEARN EVERYDAY'

Training Centers

Client Site Training

VR Training Simulations

Online Training

LEARN IT SEE IT DO IT

Relied upon by global industry leaders

4 GROWING COURSE LIBRARIES OF INDUSTRIAL TRAINING CONTENT:

- Cranes & Slings
- Industrial Safety
- Plant Maintenance
- Lift Planning Engineering

Determining a Load's Center of Gravity (CoG)

- Use and Inspection of Common Rigging Equipment
- Safe Rigging Practices
- Performing Knots and Hitches
- Hand, voice, and other audible signals
- Determining center of gravity

Calculating the Rated Capacities
of Slings Hardware:

 **ONLINE LEARNING**
ON DEMAND COURSES TO LIFT YOU TO NEW HEIGHTS

ITI OPERATORPRO

The application for **PROFESSIONAL** crane & equipment **OPERATORS**

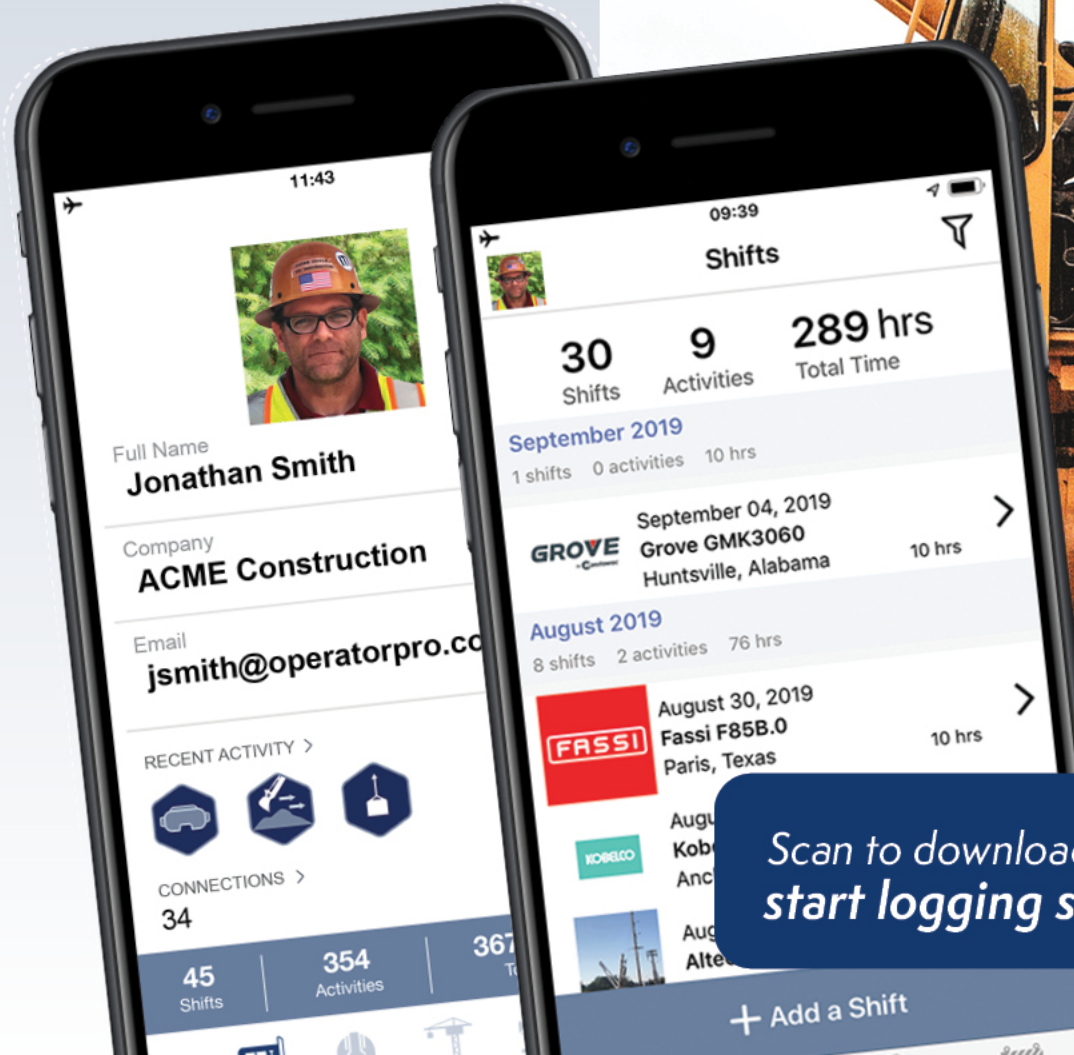

Log shifts, activities, configurations and notes on 3,000+ equipment models

Request **evaluations** and keep detailed records of your results

Upload **photos, documents,** and other **records** in a single, easily accessible place

operatorpro.com

Scan to download the app and start logging shifts today!

THE LARGEST AND MOST AUTHENTIC CRANE
SIMULATION LIBRARY ON THE PLANET SOLVING
CHALLENGES OF WORLD-CLASS ORGANIZATIONS

Crane Simulation Library

BEST USE OF VR IN EDUCATION & TRAINING

2017 WINNER

ITI VR strives to create a one-to-one experience, something that only virtual reality can provide, and we can do so with the help of Original Equipment Manufacturers that ensure everything from our operator cab and joysticks to physical capabilities and constraints are 100% accurate.

OVERHEAD GANTRY CRANE	TOWER CRANE	LATTICE BOOM CRAWLER	ROUGH TERRAIN CRANE	ROUGH TERRAIN CRANE	BOOM TRUCK CRANE	CARRY DECK CRANE	HEAVY LIFT CRAWLER
							
CAB or REMOTE OPERATED	LIEBHERR 550-EC-H	LINK-BELT 218 HSL	TADANO GR-1000XL	BRODERSON RT 400	TEREX BT-28106	BRODERSON IC 80	LIEBHERR LR 1300

Quickly assess and evaluate individual working knowledge of construction site safety.

CONSTRUCTION HAZARD ID

POWERED BY  ITI VR

INTERMEDIATE RIGGING

April 8, 9:00-5:30 EST

Instructor

Mike Goett, Edmonton

Register | \$390

MASTER RIGGER

April 9, 9:00-5:30 EST

Instructor

Mike Goett, Edmonton

Register | \$790

LIFT DIRECTOR/CRITICAL LIFT PLANNING

April 9-10, 9:00-5:30 EST

Instructor

Jim Cox, Woodland,WA

Register | \$890

REMOTE LEARNING OPPORTUNITIES

Virtual Reality

Does it have a role in certification testing?

NCCCO
FOUNDATION

An NCCCO Foundation Report

Graham Brent • 1st

Chief Executive Officer at NCCCO Foundation

1h •

Virtual Reality has established itself as a major asset in the training toolbox. Now it comes to certification testing. Or does it?

NCCCO Foundation

335 followers

1h •

Could Virtual Reality technology replace cranes in certification testing? A brand new study from the NCCCO Foundation sheds some light on the question.

Graham Brent

- CEO, NCCCO Foundation
- Founding CEO, NCCCO

VR Crane Simulations

Wallace Judd, Ph.D.

- Princeton BA
- Harvard MS
- Stanford Ph.D.
- Xerox PARC Engineer
- Apple Engineer
- ANSI Assessor
- World-leading expert in performance testing.

Introducing our candidates

Age		
18-24	2	5%
25-34	13	33%
35-44	11	28%
45-54	8	20%
55-64	4	10%
65+	1	3%
NA	1	3%
Total	40	100%

Introducing our candidates

Years		
>=	<=	N
	0	9
1	3	11
4	5	5
6	10	5
11	20	7
21	20+	3
	Total	40

Introducing our candidates

Crane Experience		
>=	<=	N
	0	9
1	100	4
101	200	3
201	500	5
501	1,000	3
1,001	10,000	14
10,001	30,000	2
	Total	40

Cranes Used:

Tadano

Cranes Used:

Link-Belt

Cranes Used:

Broderson

Virtual Crane Controls:

Tadano

Actual Controls

Virtual Crane Controls

Virtual Crane View

Test Course

- **Initial Walkaround**
- **Ball in Barrel**
- **Ball in Stop Circle**
- **Hand Signals**
- **Maze Forward**
- **Maze Backward**
- **Shutdown Procedure**

Previous Study – 2018:

Featuring 43 Participant Sets of Data

Crane1, VR1, Crane2, VR2, All Candidates

Crane Test: Retest Score Correlation: 0.88
Retest Pass/Fail Agreement: 0.83

VR Test: Retest Score Correlation: 0.69
Retest Pass/Fail Agreement: 0.72

Previous Study Issues:

Different

- Cranes
- Locations
- VR Practice
- VR and Actual Cranes

Measure Classification Accuracy

Raw data

- 53 Candidates

Classification Accuracy =

$$(10 + 20) / (40) = 30 / 40 = \mathbf{75\%}$$

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	10	5
	Fail	5	20

Final Results - Previous Study

All Candidates –

- Initial Classification Accuracy: 35%
- Limit to 10 ITITX Candidates
- Use AI To Factor the Domains
- Classification Accuracy: 95%

New Study Design:

All Candidates -

- Initial Classification Accuracy: 35%
- Limit to 10 ITITX Candidates
- Use AI To Factor the Domains
- Classification Accuracy: 95%

Second Study - 2019

Raw

- 53 Candidates

Classification Accuracy = $P_0 =$
 $(19 + 22) / (\text{All}) = \mathbf{0.77}$

Decision Consistency =
 $19 / (19 + 8) = 19 / 27 = \mathbf{70\%}$

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	19	8
	Fail	4	22

Second Study - 2019

After Initial Adjustment

- 53 Candidates

Classification Accuracy = $P_0 =$
 $(19 + 25) / (\text{All}) = \mathbf{0.83}$

Decision Consistency =
 $19 / (19 + 5) = 19 / 24 = \mathbf{79\%}$

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	19	5
	Fail	4	25

Second Study - 2019

AI Refactoring

- 53 Candidates

Classification Accuracy = $P_0 =$
 $(17 + 28) / (\text{All}) = \mathbf{0.85}$

Decision Consistency =
 $17 / (17 + 2) = 17 / 19 = \mathbf{85\%}$

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	17	2
	Fail	6	28

Second Study - 2019

AI Refactoring

- 52 Candidates

Classification Accuracy = $P_0 =$
 $(17 + 28) / (\text{All}) = \mathbf{0.87}$

Decision Consistency =
 $17 / (17 + 1) = 17 / 18 = \mathbf{94\%}$

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	17	1
	Fail	6	28

Observations:

- We now have decision consistency of 94% for the study.
- Decision consistency = $1 - \text{Type 1 Error}$
- In the 2018 Study, the Test – Retest Score Reliability was 0.88
- 2018 Study: Retest Pass/Fail Agreement: 0.83

Second Study - 2019

AI Refactoring

- 52 Candidates

Classification Accuracy = $P_0 =$
 $(17 + 28) / (\text{All}) = \mathbf{0.87}$

Decision Consistency =
 $17 / (17 + 1) = 17 / 18 = \mathbf{94\%}$

2018: Pass/Fail Agree = **83%**

		Original Data	
		Crane	
		Pass	Fail
VR	Pass	17	1
	Fail	6	28

Recommendations:

- Require at least 45 minutes VR practice prior to the VR test.
- Require & verify adequate crane experience.
- If a candidate fails the VR, offer a discounted Crane test
- Keep data on failed VR tests and follow-up Crane tests.
- The Crane test is an ADA accommodation for the VR test.

Recommendations:

VR Score	Result
100%	
	Certify on Actual Crane
1st Cutpoint	
	Allow to Test On Actual Crane
2nd Cutpoint	
	Recommend Additional Practice
0%
