- Up to 5 year warranty available

i3 LED goggles

DESCRIPTION

With all of the features and image quality you have come to expect of the IBEX® line of ultrasounds, the SuperLite/lS is the ideal choice for swine ultrasound. Hardwired to our latest high resolution transducer, the CL3, the SuperLite/lS is designed specifically for swine reproduction in the commercial setting

IBEX® SuperLite/lS has all the features you need in an ultra light, ruggedized package. The new CL3 probe provides high definition images usually found in higher end ultrasound units.

Designed specifically for swine the Ibex® Super-Lite/lS is ideal for the harsh swine environment. The InSight i3 LED headset is great for working in both bright sunlight and low light conditions—worn around the waist, the unit is lightweight and makes for a streamlined workflow. Like the other products in the IBEX line, the SuperLite/lS is rugged and water-resistant, with a long battery life.
