

Learn n' Move (domino) mat

There are several activities for this. Students can jump or hop to identify a number or solve a problem.

- number recognition
- numbers in sign language
- numbers in spanish
- numbers on dominos
- math problems

Stations

Kinesthetic KIDS

Station Two: Integrating the Senses

- Station two focuses on rolling, **pattern jumping**, leap frog, **hopping** and balancing on a beam.. It works on: coordination of the auditory, visual, and kinesthetic senses; visual tracking for visual-motor control; development of core muscles to strengthen neural pathways; sequencing of complex motor skills; patterning; problem solving; transfer from three dimensional to two dimensional input; directionality
- These concepts aid the brain in following the flow of words, sequencing patterns in math and reading, solving problems, and sorting information.

Station Eight: Higher Level Thinking with other equipment

- Station 8 focuses on **academic challenges**. It works on: higher level of dynamic balance; complex motor control; **practice and reinforcement of academic content**
- These concepts aid the brain in **anchoring information** and improved memory retrieval, preparing the brain to take a test, and combining many skills for higher-level thinking.
