Dear \_\_\_\_\_,

We are pleased to offer this letter in support of \_\_\_\_\_

Action Based Learning (ABL) is based on the brain research that strongly supports the link between movement and learning. We know that healthy, active students, make better learners, and we are excited to partner on the same mission to change the future for all children, through movement! ABL provides educational training that focuses on creating an optimal learning environment for students. ABL strategies are teacher friendly, time efficient, and most importantly — make learning fun. Students engaged in Action Based Learning show improved memory retention, increased focus and attention, improved grades, and less behavioral issues. (<https://www.youthfit.com/abl>)

We look forward to a successful ABL program and long term partnership with \_\_\_\_\_

Sincerely,

Action Based Learning
