## Valve Box Tools

### Valve Box Top Lifter

The Valve Box Top Lifter is used to lift the top section\* of slide-type valve boxes. All that is required is to dig half way around the top flange and put the lifter in place. Hook a chain to the lifter and, with a backhoe, gently lift to desired height.

### Valve Box Cover Die Bar

### 22" Valve Box Cover Tongs

- Rugged steel design
- Zinc plated for rust protection
- Extra long for less bending
- Rubber grips on handles for comfort and safety

| PRODUCT DESCRIPTION       | LENGTH | WT.    | PART NO. |
