

# A WHOLE NEW LEVEL OF SECURITY

Designed specifically for the mortgage industry

## Windows 10 Pro with TPM

### The Most Comprehensive Security

Windows uses built-in encryption to protect your device by scrambling your data to keep it secure. If your device is lost or stolen, your data is protected from unauthorized access. Your encryption key enables you to sign in to Windows and use your files as you normally would. Each TPM chip has a unique and secret RSA key burned in as it is produced, it is capable of performing platform authentication. ABT uses the TPM chip in our DeviceGuardian™ multi layer security solution. With DeviceGuardian™ we can provide business policies to restrict the download of information to flash and storage devices. Generally, pushing the security down to the hardware level in conjunction with DeviceGuardian™ provides more protection than a software-only solution.

# Security beyond the power of Microsoft

Access Business Technologies adds layers of security to your Microsoft platform.

ABT recommends the security of DeviceGuardian™ to protect your devices. That's how we deliver a comprehensive, agile platform to better protect your endpoints, quickly detect threats, and respond to security breaches across multiple devices. ABT builds and monitors all devices 24/7 provides full reports on devices health and security.

## Anti-Virus and Malware Protection

your anti-virus security solution that delivers comprehensive and real-time protection against software threats across email, cloud and web. Because it not only detects and removes viruses, spyware and malware, DeviceGuardian™ is the last thing a malware threat ever sees.

## Firewall Protection for all your Devices

network protection designed to keep hackers and malicious software from gaining access to your PC. By checking all information coming in through a network or the internet, Windows Firewall creates a protective barrier between your PC and the external world. It's your ring of fire.

## SmartScreen Filter

online protection built into DeviceGuardian™, browsers to help keep you protected from malicious websites and downloads. Your Windows PC use this always up-to-date feature to give you a superior level of 24/7 protection against phishing and malware threats when you are online.

## Trusted Platform Module (TPM)

an international standard for a secure cryptoprocessor, which is a dedicated microcontroller designed to secure hardware by integrating cryptographic keys into devices. TPM offers facilities for the secure generation of cryptographic keys, and limitation of their use, in addition to a random number generator.

## About ABT:

Access Business Technologies, headquartered in Northern California, was founded in 1999 as a leading provider of hosted, on-demand software for mortgage loan origination, servicing and pipeline management. Access Business Technologies (ABT) provides access to business technologies that empower mortgage professionals to safely perform at the top of their game anytime, anywhere. ABT proactively supports, defends and manages game-changing technologies and processes that help mortgage professionals excel.

We are a certified SSAE 16 Type II cloud solution provider to over 500 mortgage financial institutions. We are partnered with nearly a dozen leading mortgage software vendors. Our partnerships with the best mortgage software in the world integrate our cloud suite of products, to empower your workforce to produce more loans safely anywhere and anytime.
