Adagio Accounting

Adagio Accounting software is designed for small to mid-sized companies that have an accounting office, meaning accounting functions are managed by trained accountants rather than the owner / operator. It is designed to support the processes and audit controls of growing businesses. Adagio Accounting integrates with REPAY to allow credit card processing functionality right within the Adagio Accounting system. Quickly and seamlessly process your credit card transactions within AR, invoicing and order entry screens.

REPAY Vault

The REPAY vault is seamlessly integrated into Adagio allowing you to store customer payment credentials off of your own server for future use. Our vault is a PCI DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenized protection and data encryption to further enhance your security.

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus pricing plan. The Adagio integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.
