## REPAY Vault

The REPAY Vault is seamlessly integrated within the Sage 100 solution, allowing you to store customer payment credentials off of your own server for future use. REPAY Vault is a PCI/DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenized protection and data encryption to further enhance your security.

## Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus pricing plan. The Sage 100 integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

## EMV

If you have card-present transactions, REPAY can provide your business with a fully integrated EMV credit card terminal. Eliminate the need for double entry, lower chargeback risk, and lower transaction fees.

## ClickToPay

ClickToPay is an integrated online payment portal that offers a simple and secure way to have invoices paid directly from Sage 100. Simply send a copy of the invoice or sales order via email. The customer opens the email and selects their preferred payment method - either credit card or ACH. ClickToPay allows customers to create a profile and save card or bank account information on file for future payments.
