SAP Business One

Increase control over your small business with software designed to grow with you. Streamline key processes, gain greater insight into your business and make decisions based on realtime information – so you can drive profitable growth. SAP Business One includes: on-premise or cloud deployment, integrated business intelligence, integration with the SAP HANA platform, quick deployment and many end-to-end solutions designed for the success of your business.

REPAY Vault

The REPAY vault is seamlessly integrated within the SAPB1 software, allowing you to store customer payment credentials off of your own server for future use. Our vault is a PCI DSS compliant gateway with multiple reporting tools for reconciliation. Use our tokenization and encryption capabilities to further enhance security.

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus pricing plan. The SAPB1 software integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

ClickToPay

ClickToPay is an integrated online payment portal that offers a simple and secure way to have invoices paid directly from SAPB1. Simply send a copy of the invoice or sales order via email. The customer opens the email and selects their preferred payment method - either credit card or ACH. Customers can create a profile and save card or bank account information for future payments.

Schedule a Discovery Call

You need a processor that can guide you to what works best for you. With REPAY, you will always know that we are working to provide the right solution for your business.
