No matter how you bring in your content - via HDMI, VGA, USB and other popular formats – you have access to the cable or connection you need, whenever you need it. The HydraPort Architectural Connectivity System uses simple, interchangeable modules to put together the exact future-proof configuration you need today and tomorrow.

Common Applications
• With 12 available modules, the HPX-1200 is perfect for rooms that need the capability to connect many different device types to the AV system, or to provide AC power to several different devices
• The HPX-1200 is designed for any conference room, classroom or boardroom that requires extensive connection capabilities with an unobtrusive style
With the capability to accommodate AMX Metreau Keypads, the HPX-1200 is ideal for large rooms that require an additional control interface at the table or lectern, or for small huddle spaces where the Metreau Keypads are the primary control interface.

Features
- **Future-Proof Modular Design** – Features an assembly with the flexibility to change the modules to meet current and future needs.
- **Elegant and Unobtrusive** – Flush-mount design installs cleanly into a lectern or table and the lid conveniently opens in both directions providing a sleek look.
- **No Electrician Required** – HydraPort power modules can be connected directly to a wall or floor outlet eliminating the need for an electrician.
- **Control The Room** – Add Metreau® or Novara® Keypad modules to control AV devices, lighting or shades as well as to initiate pre-programmed events.
- **Anodized Aluminum** – These stylish, low profile connectivity ports have the same contemporary brushed aluminum enclosure as the higher-end office furniture manufacturers at the same price as most competitive painted metal models.
