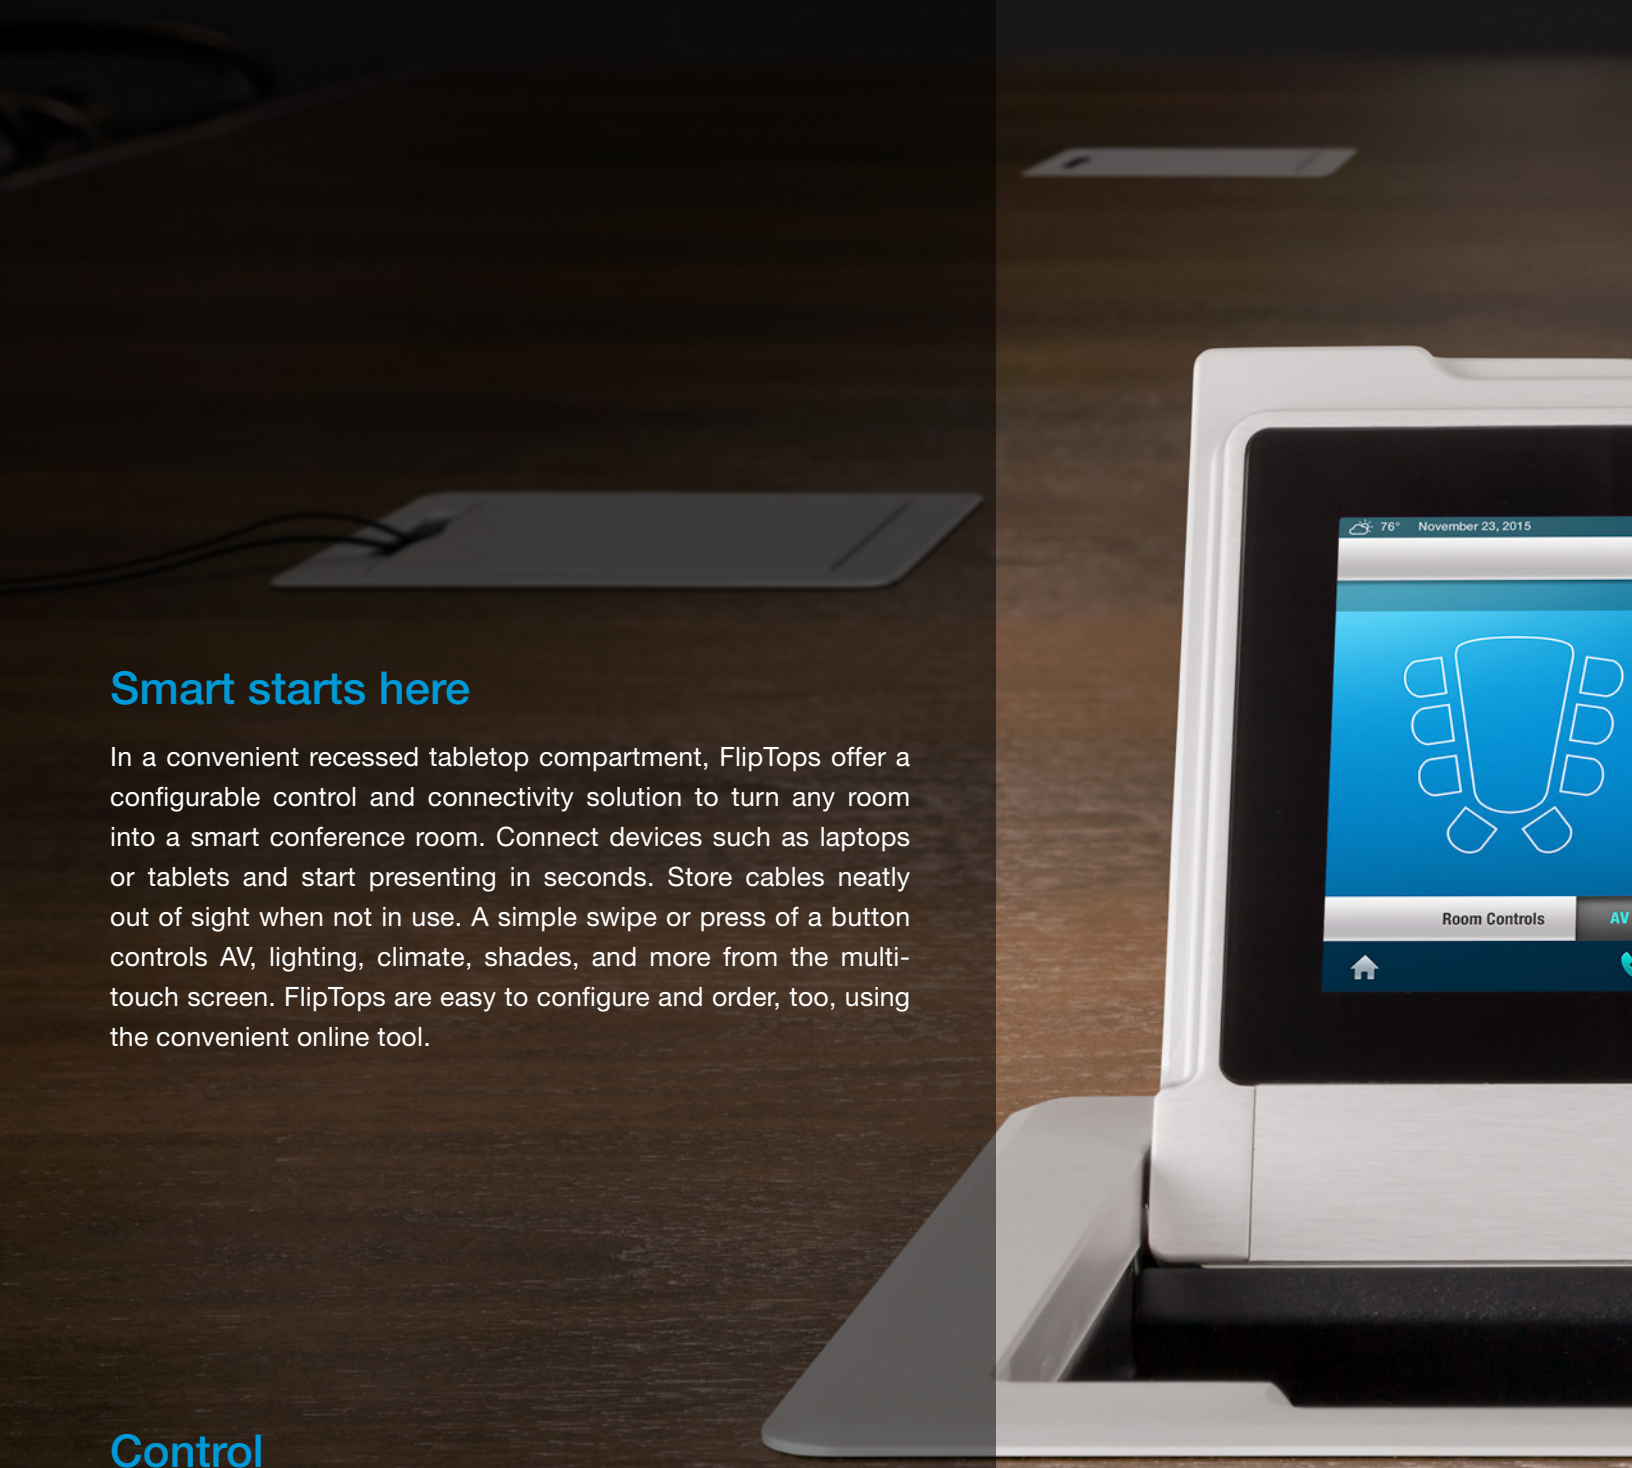
Crestron FlipTops™

The new standard in modern conference room cable management and control

CRESTRON

Smart starts here

In a convenient recessed tabletop compartment, FlipTops offer a configurable control and connectivity solution to turn any room into a smart conference room. Connect devices such as laptops or tablets and start presenting in seconds. Store cables neatly out of sight when not in use. A simple swipe or press of a button controls AV, lighting, climate, shades, and more from the multi-touch screen. FlipTops are easy to configure and order, too, using the convenient online tool.



Control

Watch your boardroom productivity soar with simple fingertip control of AV, lights, shades, and climate. FlipTops are available with an integrated 5-inch TSW touch screen with capacitive display and include on-board Rava™ SIP technology. For an all-in-one solution, opt for the FlipTop Touch Screen Control System (FT-TSC600) with an integrated 3-Series® control processor built right into the touch screen. Place one at the head of the table to give the meeting leader complete room and AV control. To provide convenient connectivity to all meeting attendees, install a basic FlipTop at every seat.

Manage

Cable pass-thru plates provide four grommeted holes to accommodate today's common AV, data, and communication cables. Cable ends stow neatly in the connection compartment ready for use. Excess cable drops out-of-sight.

For a more refined cable management solution, FlipTops accommodate up to six Crestron CBLR Cable Retractors. Presenters can access any cable and extend it up to 3'. Cables automatically lock in place at the desired length. Adjustable retraction speeds and an ergonomic easy-release lever allow cables to smoothly return into the compartment. FlipTops are available with HDMI, VGA, audio, USB, and CAT5e cables.

Connect

With FlipTops installed in your conference table or lectern you're ready to connect any device that might enter the room. Choose from popular AV and communication connector plates, including HDMI®, RJ45, DisplayPort, USB, and analog audio and video. Equip your FlipTops with AC power outlets to charge laptops and other personal devices on the spot. Choose from a dual US power outlet or a variety of international power outlets for global applications.

Sophistication

Available in black anodized or brushed aluminum finishes, FlipTops complement the décor of the finest conference tables and lecterns. The tapered, notched lid allows cables to remain connected and free of crimping when the top is closed.

FlipTops install easily and cleanly in conference tables or lecterns. You can build and order your custom FlipTops systems in just minutes using the Online Configuration Tool.
