

GUARDIAN CYBER SERVICES

Complete, Turnkey Cybersecurity Services for PSAPs

Protect Critical
Public Safety
Infrastructure

With the move to IP-based next generation 9-1-1 (NG9-1-1) systems, new, more advanced cybersecurity threats have emerged that can hamper and potentially even suspend PSAP operations. Around the world, cyberattacks have increased in numbers, types and their level of sophistication. As such, many PSAPs are turning to a managed cybersecurity approach to combat and protect their operations against potential cybersecurity threats.

Comtech Solacom's cybersecurity service provides the resources (including both the people and hardware) required to monitor and protect your Guardian equipment without end-user intervention or resources needed. Our turn-key service provides users with the ability to identify relevant assets, asset owners as well as threats/risks and methods to mitigate any threats/risks. Comtech Solacom's cybersecurity solution provides an increased level of protection over traditional out-of-the box solutions.

SOLACOM

A Subsidiary of
Comtech Telecommunications Corp.

Comtech Solacom's comprehensive cybersecurity solution includes:

- **Continuous Threat Monitoring, Endpoint Detection & Response (EDR)**
 - EDR is focused on detecting and investigating suspicious activities and other problems on hosts/endpoints including workstations, servers, gateways, firewalls or anything else connected to the internet.
- **Managed Detection & Response (MDR)** incorporating **Security Information Event Management (SIEM)** reporting, logging and archiving.
 - MDR provides threat hunting services and responds to threats upon discovery.
 - SIEM gathers security data from information system components and presents that data as actionable information via a single interface.

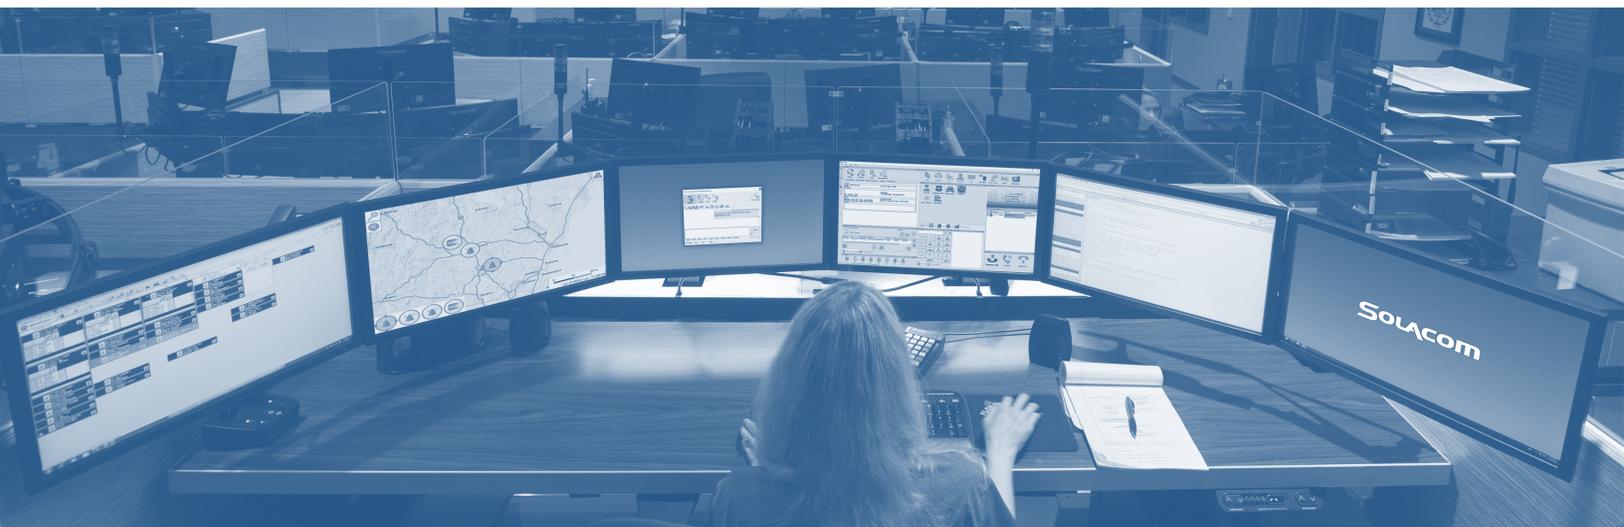

Comtech Solacom let's users stay ahead of cyberthreats with a fully managed Security Operations Center and the specialized expertise of highly trained security analysts to proactively identify potential threats against your systems and immediately provide mitigations — 24/7/365.

To keep you up to date, our managed service includes regular quarterly reports summarizing all the cybersecurity alerts received for your systems, actions taken, and provides a current assessment of your overall cybersecurity status.

By partnering with you to create an overall Cybersecurity Risk Assessment, we can pinpoint and prioritize vulnerabilities to get a clear view of your current risk profile. From there, we evaluate your cybersecurity posture, including policies and procedures as well as hardware, and software.

Partner With an Industry Innovator

At Comtech Solacom, public safety communications management is not a sideline, it's our single focus. Our 9-1-1 call handling and management solutions are built on more than 30 years of research and innovation in the application of advanced hardware and software technologies for public safety. Today, our 9-1-1 solutions support thousands of agencies affecting millions of lives annually. From dense urban environments to statewide deployments, our solutions are trusted to streamline 9-1-1 call handling and management processes and enable more efficient collection of critical information in emergency situations.
