

Intellect Compliance Platform

Empowering Everyone to Innovate

The **Intellect Compliance Platform** is a no-code environment that enables non-programmers to modify or build business apps that address unique business needs faster than ever. Intellect is optimized to help organizations meet compliance due to our compliant ready apps that can be further configured to meet any unique or new regulatory requirement.

Digital transformation is now in your control.

True Digital Transformation

Automate any business process, meet any compliance requirement, optimize your business, and deliver exceptional results with Intellect. Our no-code platform enables non-programmers to configure business apps with custom forms, workflows, logic, notifications, and reports that match the unique needs of your business today and in the future.

Enterprise Mobility Made Easy

Deploy your business apps as native mobile apps for any iOS and Android devices in minutes, with the power to capture data even when internet connectivity is lost.

The Intellect Compliance Platform offers the industry's most configurable solution

Beyond Compliance, Better Performance

intellect

at a glance...

● No-Code Platform for Business Apps

Create, launch and manage one or an entire library of business apps ranging from simple to highly complex, mission-critical apps.

● Easily Create Forms

Create smart forms to capture information and photos anywhere, anytime, and instantly build a database in the back-end.

● Automate with Workflow

Assign tasks and actions to individuals or groups, automatically send reminders or notifications by email or text message, and see where a task is at all times.

● Custom Reports

Easily develop and run custom, dynamic reports to gain real-time insights, improve performance, cut costs and make smarter, faster decisions.

● Integrate Other Apps

Leverage legacy applications by integrating with ERP, CRM or other enterprise systems through business logic, web services, XML and simple LDAP/AD integration.

● Go Mobile in Minutes

Deploy any business apps built on the Intellect Compliance Platform as a native mobile app on any IOS and Android device in minutes, with the power to capture data even when connectivity is lost.

● No Programming

No programming or software coding from design to deployment, providing a rapid to launch solution ideal for organizations with constrained IT resources.

● Instantaneous Updates

When you input or change data in the office or on the go, all data is immediately synced up and available for the right users at the right time.

● Security

Define security on a granular level (field, table, template, app etc.) based on a single user, user group or by roles.

● Cloud, Private Cloud or On-Premises

Host your Intellect business apps in the cloud (Amazon Web Services), a private cloud (e.g., on Microsoft Azure), or on your servers.
