Úvod

Táto publikácia je výsledkom projektu Erasmus+ (L)Learn & Lead - Transformácia tradičnej jazykovej školy prostredníctvom inovácie obchodného modelu (ďalej v texte "LandL").

Projekt LandL reflektuje súčasné zmeny v podnikateľskom prostredí a zameriava sa na rozvoj nového obchodného modelu pre obchodné školy, ktorý je založený na transformácii produktu na hodnotnejšiu formu jazykového vzdelávania, ktorá spája jazykové a odborné vzdelávanie. Takáto transformácia umožňuje jazykovej škole byť nielen poskytovateľom jazykového vzdelávania, ale efektívne ho prepojiť s odborným vzdelávaním zameraným na podnikanie a osobnostný rozvoj.

Základom na dosiahnutie týchto cieľov je strategická koncepcia Learn & Lead. Learn & Lead je strategická koncepcia, ktorá poskytuje alternatívu k pretrvávajúcej stagnácii v podnikaní tým, že integruje niekolko inovatívnych klúčových prvkov na transformáciu tradičnej jazykovej školy na inovatívny a nákladovo efektívny podnik.

Týmito klúčovými prvkami sú prístup zameraný na učiaceho sa, rozvoj kurzov typu LL2 a LL3, výučba a riadenie zvyšovania kvalifikácie zamestnancov a rozvoj podnikateľského plánu na základe analýzy trhu. Prečo - Vízia šťastnej školy.

S cieľom podporiť organizácie a jednotlivcov na ich ceste partnerstvo vytvorilo 4 špecifické kurzy pre jednotlivé odvetvia a kurzy kombinovaného vzdelávania pre ľudí a podnikanie:

- 1) Spoločné budovanie kultúry excelencie

- 4) Posilnenie postavenia ľudí v práci

Účelom tejto príručky je podporiť študentov na ich ceste k zlepšeniu seba a svojej organizácie pomocou tohto kurzu kombinovaného vzdelávania "Spoločné budovanie kultúry výnimočnosti" a poskytnúť informácie, ktoré môžu podporiť proces učenia, ako aj jasný návod krok za krokom.

Chapter

The methodology – questions and answers

1. STUDENTS TYPOLOGY AND THE RELEVANT LEARNING STYLES

LEARNING STYLES

What are learning styles?

They are the ways that different students learn. A style of learning refers to an individual's preferred way to absorb, process, comprehend and retain information. Learning styles can be defined, classified, and identified in many different ways. Generally, they are overall patterns that provide direction to learning and teaching. Learning style can also be described as a set of factors, behaviours, and attitudes that facilitate learning for an individual in a given situation.

How many learning styles are there?

There are 4 KEY learning styles are: visual, auditory, reading & writing and kinesthetic.

What are the characteristics of visual learners?

Auditory learners prefer to listen, discuss, memorize and debate in class. They learn best from audiobooks rather than print ones. Auditory learners rather listen to a lecture than read written notes, and they often use their own voices to reinforce new concepts and ideas. These types of learners prefer reading out loud to themselves. They aren't afraid to speak up among other people and are great at verbally explaining things.

What is characteristic of kinesthetic learners?

Kinesthetic learners learn best by touch and movement—they find opportunities to take part in demonstrations, writing or building models. Taking a physically active role, kinesthetic learners are hands-on and thrive when engaging all of their senses during course work. These learners tend to work well in scientific studies due to the hands-on lab component of the course. Kinesthetic learners

prefer to use their whole body in the learning process—they use gestures to communicate ideas and learn best in a hands-on environment.

What are characteristics of reading&writing learners?

They focus on the written words. Reading and writing learners succeed with written information on worksheets, presentations, and other text-heavy resources. These learners are note-takers and perform strongly when they can reference written text.

How knowing your learning style can help you to improve your academic success?

Learning styles pinpoint strengths and weaknesses when it comes to learning information. Knowing your learning style can help you create study activities that work best for you and can be tailored to your learning preferences. How you like to study has nothing to do with your learning style.

What is your learning style?

To discover your learning style, you can take an online assessment, like the VARK Questionnaire <https://vark-learn.com/the-vark-questionnaire/> After answering the multiple-choice questions, you'll receive your results.

What else can you do to assess your learning style?

If the assessment's results don't feel right, you can also observe yourself and your previous learning experiences to get an idea of how you learn best.

STUDENTS' TYPOLOGY

What is student's typology?

It is a kind of student's behaviour or a unique way through which the student perceives the world and interacts with the world.

Why the awareness of students' typology is important?

When we are aware of what and how many types of students are, we can better understand how and why others see the world differently from us. This awareness leads to greater compassion and acceptance of others. Each student's type has a

different motivation. Our motivation is a powerful force that drives most of our behaviour especially when the world around us supports and reinforces our motivation.

How many type of students are there?

There are 9 main types of students: The Serious Hard Worker, The People Pleasing Mentor, The Star of the Group, The Misunderstood Creative, The Intellectual Outsider, The Questioning Friend, The Cheerleader, The Challenger, The Accommodating Companion

What is characteristic in the serious hard worker?

The Serious Hard Worker has the motivation to be good and correct. He focuses on what's wrong (what's not as it should be). He follows rules, standards, and principles so closely that they will meet all expectations.

What is characteristic in the people pleasing mentor?

The People Pleasing Mentor wants to be appreciated. He focuses on other people and their needs. He earns appreciation by being kind to others.

What is characteristic in the star of the group?

The Star of the Group wants to be always successful. His focus is on results and achievement. His strategy is to win the esteem of others.

What is characteristic in the misunderstood creative?

His motivation is to find a special and unique identity. The Misunderstood Creative focuses on what's missing. His strategy is to withdraw from convention and get people to notice how different I am.

What is characteristic in the intellectual outsider?

The Intellectual Outsider 's motivation is to be competent and intelligent. He concentrates on what he knows and does well. He wants to withdraw from the world to study it.

What is characteristic in the questioning friend?

The Questioning Friend wants to be supported and secure. His focus is on uncertainties, risks, dangers, the unknown. He seeks guidance from those he trusts.

What is characteristic in the cheerleader?

Being happy and fulfilled is The Cheerleader's motivation. He concentrates on being positive. Always seeks happiness/ excitement in the world around them.

What is characteristic in the challenger?

The Challenger protects himself and he is in control. He focuses on power and justice. His strategy is to assert his independence.

What is characteristic in the accommodating companion?

The Accommodating Companion wants to be at peace. He focuses on people's point of view and denies own opinions and wants to accommodate others.

Multiple intelligence

What is a Multiple Intelligence Theory?

Howard Gardner's Multiple Intelligence Theory was first published in Howard Gardner's book, *Frames Of Mind* (1983), and quickly became established as a classical model by which to understand and teach many aspects of human intelligence, learning style, personality and behaviour - in education and industry. Howard Gardner initially developed his ideas and theory on multiple intelligences as a contribution to psychology, however, Gardner's theory was soon embraced by education, teaching and training communities, for whom the appeal was immediate and irresistible - a sure sign that Gardner had created a classic reference work and learning model.¹

What types of intelligences are there in MI?

Originally there were the following types of MI identified:

intelligence type	capability and perception
-------------------	---------------------------

Linguistic	words and language
Logical-Mathematical	logic and numbers
Musical	music, sound, rhythm
Bodily-Kinesthetic	body movement control
Spatial-Visual	images and space
Interpersonal	other people's feelings

Recently other types have been added:

intelligence type	capability and perception
Naturalist	natural environment
Spiritual/Existential	religion and 'ultimate issues'
Moral	ethics, humanity, value of life

How can this theory help me learn better?

The more you know about your preferred types of intelligences the better results in learning and life in general you can accomplish. You can test yourself and find out what you are prevailing types and how the theory of MI can help you upgrade and optimize your learning in general.

What can I do for me once I learn what my most dominant types of MI are?

When you find out more about your preferred types of MI, you can identify your dominant capabilities and perceptions. Based on this you can see what typical roles are connected to those types of MI and their related tasks and activities. You can see how much this description fits your current knowledge of yourself and your current role in your life. You can improve the quality of your learning by simply following the

suggested preferred learning styles that correspond to your most dominant types of MI.

Are there any online tools that can do right now?

Yes, of course. For more detailed information about the theory of MI you visit <https://www.businessballs.com/self-awareness/howard-gardners-multiple-intelligences/>. There are free tests available for you to use – pdf, excel formats.

What else can I do with the knowledge of MI?

Once you learn about this theory, you can also help other people in your surrounding to find out about their learning preferences and thus you can contribute to the upgrade of their quality in life. We live in the world that inevitably pushes all of us into the life-long learning path and so you can succeed in learning whatever you need when you know HOW. Each individual is different and so learning about us is the key to our happy life.

2. PRÍSTUP ZMIEŠANÉHO VZDELÁVANIA

Čo je zmiešané vzdelávanie?

Zmiešané vzdelávanie je vzdelávací prístup, ktorý kombinuje metódy osobnej odbornej prípravy/vyučovania a online materiály a iné interakcie online. Študenti/žiaci sa učia na klasických vyučovacích hodinách, ale zároveň sa určitá časť učenia organizuje online. Niekedy sa zmiešané vzdelávanie nazýva aj "hybridné vzdelávanie". Je to pomerne nový prístup k vzdelávaniu, pričom termín "blended learning" bol prvýkrát použitý a opísaný v roku 1999.

Aké metódy/platformy sa používajú v rámci "zmiešaného vzdelávania"?

Na poskytovanie vzdelávacieho obsahu sa používajú rôzne platformy/metódy - e-learning, webináre, osobné stretnutia so školiteľom/učiteľom, online stretnutia so školiteľom/učiteľom, Facebook, e-mail, chatové denníky, podcasty, blogy, YouTube, Twitter atď.

Aj keď je celý proces vzdelávania organizovaný online a v prípade potreby sú k dispozícii osobné stretnutia/konzultácie alebo online stretnutia so školiteľom/učiteľom v reálnom čase, nazývame to "zmiešané vzdelávanie".

Existujú rôzne typy kombinovaného vzdelávania?

Áno, existujú rôzne modely kombinovaného vzdelávania, takže je možné vybrať si ten najvhodnejší pre dosiahnutie najlepších výsledkov a zároveň rešpektovať potreby každého študenta. Sú to napríklad: face-to-face driver, obrátená trieda, obohatená virtuálna trieda, flexi model atď.

Sú výsledky zmiešaného vzdelávania lepšie ako výsledky výlučne prezenčného vzdelávania?

Vo všeobecnosti sa uvádza, že riešenie zmiešaného vzdelávania je účinnejšie ako čisto prezenčná odborná príprava. Vďaka kombinácii digitálnej výučby a osobného vyučovania môžu študenti pracovať samostatne. Učitelia/školitelia majú potom viac času na prácu so študentmi a ich podporu na individuálnej úrovni.

Zvyčajne je tento typ školenia/výučby lacnejší, pretože nie je potrebná priama "každodenná" účasť školiteľa/učiteľa.

Zmiešané vzdelávanie si vyžaduje, aby študenti preukázali väčšiu samostatnosť, aby dosiahli úspech. Ak učitelia ponúknu určitú formu úvodnej orientácie v programe pred zavedením stratégii kombinovaného vzdelávania, môžu lepšie pripraviť študentov, aby sa cítili sebaisto v rôznych zložkách a aby si vytvorili silnejší pocit nezávislosti.

Je pre mňa vhodnejší prístup zmiešaného vzdelávania ako bežná prezenčná výučba?

Metóda kombinovaného vzdelávania môže pomôcť pri zapájaní študentov a zvyšovaní ich spokojnosti. Najmä ak patríte k študentom, ktorí majú problém udržať si pozornosť počas prezenčných školení a ste skôr vizuálny študent, potom bude mať metóda zmiešaného vzdelávania údajne pozitívny vplyv na vaše štúdium.

Ďalšími pozitívnymi skutočnosťami sú: štúdium vlastným tempom, väčšia dostupnosť, využívanie ďalších online materiálov, individuálna podpora zo strany učiteľa/školiteľa v prípade potreby, interaktívne zážitky atď.

Existujú nejaké nevýhody kombinovaného vzdelávania?

Áno, kombinovaný prístup k učeniu má popri výhodách aj niektoré nevýhody. Ide najmä o technologickú náročnosť, príliš vysokú kognitívnu záťaž študentov alebo problémy s dôveryhodnosťou, ktoré môžu nastať, keď si študenti sami vyhľadávajú dodatočné informácie. Tento negatívny efekt veľmi závisí od tútora a jeho prípadných prekážkových znalostí a pripravenosti na riešenie. Tieto nevýhody sa dajú zmierniť, keď tútor so študentmi vopred pracuje, napríklad im vysvetlí, ako rozpoznať, že dodatočné online materiály, ktoré môžu nájsť na internete, sú dôveryhodné.

3. HODNOTENIE KURZU A METODIKA HODNOTENIA

Budem počas kurzu kombinovaného vzdelávania hodnotený?

Áno, budete. Každý kurz bude mať svoj vlastný typ hodnotenia a posudzovania.

S akými typmi hodnotenia alebo posúdenia sa stretнем?

Testy, kvízy, krátke otázky a odpovede, dotazníky atď.

Prečo musím byť hodnotený a posudzovaný?

Hodnotenie kurzu je prostriedkom na získanie spätej väzby, ktorú môže učiteľ a škola využiť na posúdenie kvality výučby. Proces (a) zhromažďovania informácií o vplyve výučby a vyučovacích postupov na učenie sa študentov, (b) analýzy a interpretácie týchto informácií a (c) reagovania na výsledky a konania na ich základe je cenný z niekoľkých dôvodov. Umožňujú vyučujúcim preskúmať, ako ostatní interpretujú ich vyučovacie metódy. Tieto informácie môžu spolu s ďalšími podkladmi využiť aj administrátori pri prijímaní sumatívnych rozhodnutí.

Aké sú typy hodnotenia?

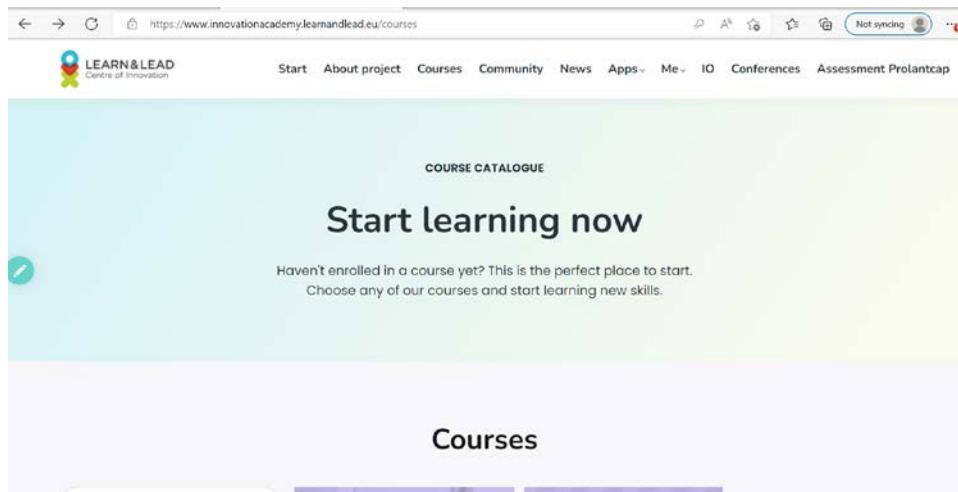

Predbežné hodnotenie alebo diagnostické hodnotenie, formatívne hodnotenie, sumatívne hodnotenie, konfirmačné hodnotenie, hodnotenie podľa noriem, hodnotenie podľa kritérií a ipsatívne hodnotenie.
