| MEASUREMENT AND DATA | 2.MD |
| Grade 2 Content Standards | Sadlier Math, Grade 2 |
| Measure and estimate lengths in standard units |  |
| MGSE2.MD. 1 Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. | Chapter 6: 6-1 through 6-6 |
| MGSE2.MD. 2 Measure the length of an object twice, using length units of different measurements; describe how the two measurements relate to the size of the unit chosen. Understand the relative size of units in different systems of measurement. For example, an inch is longer than a centimeter. (Students are not expected to convert between systems of measurement.) | Chapter 6: 6-7 |
| MGSE2.MD. 3 Estimate lengths using units of inches, feet, centimeters, and meters. | Chapter 6: 6-1 through 6-5 |
