## Sadlier School

| Use the four operations with whole numbers to solve problems. |  |
| :---: | :---: |
| 4.OA. 1 Interpret a multiplication equation as a comparison, e.g., interpret $35=5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5 . Represent verbal statements of multiplicative comparisons as multiplication equations. | Chapter 4: 4-5 <br> Chapter 5: 5-5 |
| 4.OA.2 Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison. Drawings need not show details, but should show the mathematics in the problem. (This applies wherever drawings are mentioned in the Standards.) | Chapter 4: 4-5 <br> Chapter 5: 5-5 <br> Chapter 7: 7-6 <br> Chapter 8: 8-8 |
| 4.OA. 3 Solve multistep word problems posed with whole numbers and having wholenumber answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. | Chapter 2: 2-1 through 2-3 <br> Chapter 3: 3-1 \& 3-6 <br> Chapter 4: 4-4 <br> Chapter 7: 7-3 <br> Chapter 8: 8-1 \& 8-3 |

## Gain familiarity with factors and multiples.

4.0A. 4 Find all factor pairs for a whole number

Chapter 9: 9-1 through 9-5 in the range 1-100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range $1-100$ is a multiple of a given onedigit number. Determine whether a given whole number in the range 1-100 is prime or composite.

## Sadlier School

| Generate and analyze patterns. |  |
| :--- | :--- |
| 4.OA.5 Generate a number or shape pattern that | Chapter 7: 7-5 |
| follows a given rule. Identify apparent features | Chapter 17: 17-5 |
| of the pattern that were not explicit in the rule |  |
| itself. For example, given the rule "Add 3" and |  |
| the starting number 1, generate terms in the |  |
| resulting sequence and observe that the terms |  |
| appear to alternate between odd and even |  |
| numbers. Explain informally why the numbers |  |
| will continue to alternate in this way. |  |

## NUMBER AND OPERATIONS IN BASE TEN

## 4.NBT

Grade 4 Content Standards

| Generalize place value understanding for multi-digit whole numbers less than or equal to <br> 1,000,000. |  |
| :--- | :--- |
| 4.NBT.1 Recognize that in a multi-digit whole <br> number, a digit in one place represents ten <br> times what it represents in the place to its <br> right by applying concepts of place value, <br> multiplication, or division. | Chapter 1: 1-2 \& 1-3 |
| 4.NBT.2 Read and write multi-digit whole <br> numbers using standard form, word form, and <br> expanded formG. Compare two multi-digit <br> numbers based on meanings of the digits <br> in each place, using >, =, and < symbols to <br> record the results of comparisons. Grade 4 <br> expectations in this domain are limited to whole <br> numbers less than or equal to 1,000,000. |  |
| 4.NBT.3 Use place value understanding to round |  |
| multi-digit whole numbers to any place through |  |
| 1,000,000. | Chapter 1: 1-5 |

## Sadlier School

## NUMBER AND OPERATIONS IN BASE TEN

## Grade 4 Content Standards

| Use place value understanding and properties of operations to perform multi-digit arithmetic with whole numbers less than or equal to 1,000,000. |  |
| :---: | :---: |
| 4.NBT. 4 Fluently ${ }^{6}$ add and subtract multi-digit whole numbers using a standard algorithm ${ }^{6}$. | Chapter 2: 2-2, 2-4 through 2-6 Chapter 3: 3-2 through 3-5 |
| 4.NBT. 5 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | Chapter 4: 4-1 through 4-3 <br> Chapter 5: 5-1 through 5-5 <br> Chapter 6: 6-1 through 6-5 <br> Chapter 8: 8-7 |
| 4.NBT. 6 Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/ or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | Chapter 7: 7-1, 7-2 \& 7-4 Chapter 8: 8-1 through 8-7 |

## NUMBER AND OPERATIONS - FRACTIONS

| Extend understanding of fraction equivalence and ordering limited to fractions with |
| :--- |
| denominators $2,3,4,5,6,8,10,12$, and 100 . |
| 4.NF.1 Explain why a fraction $a / b$ is equivalent Chapter 10: 10-1 through 10-6 <br> to a fraction $(n \times a) /(n \times b)$ by using visual  <br> fraction models, with attention to how the  <br> number and size of the parts differ even though  <br> the two fractions themselves are the same size.  <br> Use this principle to recognize and generate  <br> equivalent fractions.  |

## Sadlier School

## NUMBER AND OPERATIONS - FRACTIONS

Grade 4 Content Standards
4.NF. 2 Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1 / 2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model.

Chapter 10: 10-7 through 10-11

Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers limited to fractions with denominators $2,3,4,5,6,8,10,12$, and 100. (Fractions need not be simplified).
4.NF. 3 Understand a fraction $a / b$ with $a>1$ as a sum of fractions $1 / b$.

| a.Understand addition and subtraction of <br> fractions as joining and separating parts <br> referring to the same whole. | Chapter 11: 11-1 through 11-5 |
| :--- | :--- |
| b.Decompose a fraction into a sum of <br> fractions with the same denominator <br> in more than one way, recording each <br> decomposition by an equation. Justify <br> decompositions, e.g., by using a visual <br> fraction model. Examples: $3 / 8=1 / 8+1 / 8+$ <br> $1 / 8 ; 3 / 8=1 / 8+2 / 8 ; 21 / 8=1+1+1 / 8=8 / 8$ <br> $+8 / 8+1 / 8$. | Chapter 11: 11-2 through 11-4 |
| c.Add and subtract mixed numbers with <br> like denominators, e.g., by replacing each <br> mixed number with an equivalent fraction, <br> and/or by using properties of operations <br> and the relationship between addition and <br> subtraction. | Chapter 10: 10-9 |
| C.Solve word problems involving addition <br> and subtraction of fractions referring to the <br> same whole and having like denominators, <br> continued | Chapter 11: 11-1 through 11-5 11-8 |

## Sadlier School

## NUMBER AND OPERATIONS - FRACTIONS

e.g., by using visual fraction models and equations to represent the problem.
4.NF. 4 Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.
a. Understand a fraction $a / b$ as a multiple of $1 / b$. For example, use a visual fraction model to represent $5 / 4$ as the product $5 \times(1 / 4)$, recording the conclusion by the equation $5 / 4=5 \times(1 / 4)$ or $5 / 4=(1 / 4)+(1 / 4)+(1 / 4)+$ $(1 / 4)+(1 / 4)$.
b. Understand a multiple of $a / b$ as a multiple of $1 / b$, and use this understanding to multiply a fraction by a whole number. For example, use a visual fraction model to express $3 \times(2 / 5)$ as $6 \times(1 / 5)$, recognizing this product as 6/5. (In general, $n \times(a / b)=$ $(n \times a) / b$.)
c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. For example, if each person at a party will eat 3/8 of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?

Chapter 12: 12-1 through 12-4

Chapter 12: 12-1 through 12-5

Understand decimal notation for fractions, and compare decimal fractions limited to fractions with denominators $2,3,4,5,6,8,10,12$, and 100.
4.NF. 5 Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. For example, express 3/10 as 30/100, and add 3/10

Chapter 13: 13-1 through 13-5

## Sadlier School

| + 4/100 = 34/100. In general, students who <br> can generate equivalent fractions can develop <br> strategies for adding fractions with unlike <br> denominators, but addition and subtraction <br> with unlike denominators is not a requirement <br> at this grade. |  |
| :--- | :--- |
| 4.NF.6 Use decimal notation for fractions with <br> denominators 10 or 100. For examp/e, rewrite <br> 0.62 as 62/100; describe a length as 0.62 <br> meters; locate 0.62 on a number line diagram. | Chapter 13: 13-3 through 13-5 |
| 4.NF.7 Compare two decimals to hundredths |  |
| by reasoning about their size. Recognize that |  |
| comparisons are valid only when the two |  |
| decimals refer to the same whole. Record the |  |
| results of comparisons with the symbols >, =, |  |
| or <, and justify the conclusions, e.g., by using a |  |
| visual model. |  |

Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit.
4.MD. 1 Know relative sizes of the metric measurement units within one system of units. Metric units include kilometer, meter, centimeter, and millimeter; kilogram and gram; and liter and milliliter. Express a larger measurement unit in terms of a smaller unit. Record measurement conversions in a twocolumn table. For example, express the length of a 4-meter rope in centimeters. Because 1 meter is 100 times as long as a 1 centimeter, a two-column table of meters and centimeters continued

Chapter 14: 14-1 through 14-10

| includes the number pairs 1 and 100, 2 and 200, <br> 3 and $300, \ldots$. |  |
| :--- | :--- |
| 4.MD.2 Solve real-world problems involving <br> money, time, and metric measurement. | Chapter 14: 14-1 through 14-9 <br> Chapter 15: 15-1 through 15-3 |
| a. Using models, add and subtract money and <br> express the answer in decimal notation. |  |
| b. Using number line diagrams <br> other models, add and subtract intervals of or <br> time in hours and minutes. | Chapter 15: 15-3 |
| c. Add, subtract, and multiply whole numbers <br> to solve metric measurement problems <br> involving distances, liquid volumes, and <br> masses of objects. | Chapter 14: 14-6 through 14-9 |
| 4.MD.Develop efficient strategies to determine <br> the area and perimeter of rectangles in real- <br> world situations and mathematical problems. <br> For example, given the total area and one side <br> length of a rectangle, solve for the unknown <br> factor, and given two adjacent side lengths of a <br> rectangle, find the perimeter. | Chapter 17: 17-6 \& 17-7 |

## Represent and interpret data.

4.MD. 4 Display and interpret data in graphs (picture graphs, bar graphs, and line plots ${ }^{6}$ ) to solve problems using numbers and operations for this grade.

Chapter 15: 15-6 \& 15-7

Geometric measurement: understand concepts of angle and measure angles.
4.MD. 4 Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement.

| a. Understand an angle is measured with |
| :--- | :--- |
| reference to a circle with its center at |
| the common endpoint of the rays, by |
| considering the fraction of the circular arc |
| between the points where the two rays |
| intersect the circle. An angle that turns |
| through 1/360 of a circle is called a "one- |
| degree angle," and can be used to measure |
| angles. |$\quad$ Chapter 16: 16-2 $\quad$.

Draw and identify lines and angles, and classify shapes by properties of their lines and angles.
4.G.1 Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in twodimensional figures.
4.G.2 Classify two-dimensional figures based

Chapter 16: 16-1 through 16-6

Chapter 17: 17-1 through 17-3
on the presence or absence of parallel or perpendicular lines or the presence or absence of angles of a specified size.
