

Curing SMB Pain Points with Managed Services

Running an IT environment for a small-to-medium sized business is a tall order. There's a million and one challenges and only a small team to face them with. Managed services can help. Match the common hardships of a small IT department with a solution below to discover how the right managed services agreement can help you succeed.

"My team struggles to keep up with nitty gritty maintenance tasks."

Offload routine and complex recurring tasks to a qualified managed services team.

"My team has jack-of-all-trades administrators, but few specialists."

Depend upon a team of experienced engineers and specialists standing by for maintenance, repair, or project work.

"Sick days and vacation time leave us short-staffed and under resourced."

24x7x365 Monitoring with immediate alerts sent to the IT department.

"Our team is too small to staff a constant graveyard shift administrator to monitor the environment."

Enjoy flexible agreements which can be modified to account for emerging challenges.

"Any turnover in the IT department deprives us of essential knowledge and skills."

Mindsight offers several managed service options.
